

Trimethylolpropane Trimethacrylate

Trimethylolpropane trimethacrylate or TMPTMA is a unique trifunctional monomer because of its low volatility and its fast cure response. It is also chemical and wear resistant making it ideal for various coatings anaerobic adhesive and composite applications.

TYPICAL PROPERTIES

Item #	Molecular Formula	Molecular Weights	Color (APHA)	Purity (%)	Inhibitor
X-947-7446	C ₁₈ H ₂₆ O ₆	338.400	25 max	>90.0	MeHQ – 80-120 ppm
X-947-7466	C ₁₈ H ₂₆ O ₆	338.400	25 max	>90.0	BHT – 80-120 ppm
