

Item # X-951-0080, BisGMA/Triethyleneglycol Dimethacrylate (80/20)

To simplify your formulation processes, we provide bis GMA already diluted in an 80:20 ratio with TEGDMA. Bis-GMA and triethylene glycol dimethacrylate are commonly paired in dental formulations. All of our bisGMA products carry the lowest levels of BPA or bisphenol A on the market.

TYPICAL PROPERTIES

Refractive Index	1.527
Viscosity @ 25°C (cps)	6775 - 11350
Color (APHA)	<150
Inhibitor	MeHQ – 600 max ppm
Toxic Substance Control Act List	Listed
BisGMA %	78 - 82
TEGDMA %	18 - 22
