
Item # X-863-0050, Surface Active Monomers, NTG-GMA, Sodium Salt

CAS#: 133736-31-9

The Sodium Salt of NTG-GMA is an adhesive that bridges the gap between hydrophobic and hydrophilic substrates. It has been traditionally used in dental adhesives. Na Salt of NTG-GMA is TSCA listed and can be solubilized in acetone

TYPICAL PROPERTIES

Molecular Formula	$C_{16}H_{20}NO_5N$
Molecular Weight	329.328
Purity (%)	>85
Moisture (%)	<20
Toxic Substance Control Act List	Listed
