

Ethylene Glycol Dimethacrylate

Ethyleneglycol dimethacrylate, EGDMA acts as a cross-linking agent between polymer chains. Also known as ethylene dimethacrylate or monoethylene glycol dimethacrylate, this difunctional monomer has similar reactivity to methyl methacrylate and low water absorption.

TYPICAL PROPERTIES

Item #	Molecular Formula	Molecular Weights	Color (APHA)	Purity (%)	Inhibitor
X-942-7224	C ₁₀ H ₁₄ O ₄	198.218	10 max	>99.0	HQ – 40-80 ppm
X-942-5224	C ₁₀ H ₁₄ O ₄	198.218	10 max	>99.5	HQ – 40-80 ppm
X-949-7244	C ₁₀ H ₁₄ O ₄	198.218	10 max	>99.0	MeHQ – 40-80 ppm
