

## Item # X-753-0000, 2-Hydroxyethyl Methacrylates/Succinates

CAS#: 20882-04-6

HEMA succinate is one alternative to existing dental adhesive systems. It combines the reactivity of succinic acid with the adhesive characteristics of HEMA.

### TYPICAL PROPERTIES

Molecular Formula	C <sub>10</sub> H <sub>14</sub> O <sub>6</sub>
Molecular Weight	230.216
Purity (%)	80 - 95
Inhibitor, ppm	MeHQ – 70 max, BHT – 400 to 600
Toxic Substance Control Act List	Listed
