

Item # X-958-7466, Tetrahydrofurfuryl Methacrylate

Product Name: Tetrahydrofurfuryl Methacrylate, THFMA, THF Methacrylate

CAS#: 2455-24-5

Tetrahydrofurfuryl Methacrylate or THFMA is a polar monomethacrylate containing a five-membered heterocyclic group that works well as an adhesion promoter in anaerobic adhesive and other applications.

TYPICAL PROPERTIES

Molecular Formula	C ₉ H ₁₄ O ₃
Molecular Weight	170.208
Refractive Index	1.456
Color (APHA)	<100
Inhibitor	BHT: 400 – 700 ppm
Specific Gravity	1.04 g/mL
