## Item # X-821-2000, Methacroyloxyethyl Phthalates

---

**CAS#:** 27697-00-3

HEMA Phthlate, also known as MEP, PAMM, Phthalic Acid Monoethyl Methacrylate or Mono HEMA Phthlate is an aromatic, carboxylic acid-containing monomer that lends itself to many adhesive and emulsion applications where the functionality of a methacrylate is needed. One common application is anaerobic adhesives.

---

### TYPICAL PROPERTIES

Molecular Formula	$C_{14}H_{14}O_6$
Molecular Weight	278.260
Purity (%)	>75
Moisture (%)	<0.5
Refractive Index	1.515
Viscosity @ 25°C, cps	500 - 4000
Toxic Substance Control Act List	Listed
