

## **Item # X-866-4000, N,N-Dihydroxyethyl-Para-Toluidine**

DHEPT or N-N-bis(2-hydroxyethyl)-P-toluidine is a solid amine that is ideal for chemical-cure systems using peroxides. Good for color sensitive applications, DHEPT serves as an alternative to DMAEMA or DMPT.

### TYPICAL PROPERTIES

|                                  |   |
|----------------------------------|---|
| Molecular Formula                | C <sub>11</sub> H <sub>17</sub> NO <sub>2</sub> |
| Molecular Weight                 | 195.262   |
| Purity                           | >97   |
| Toxic Substance Control Act List | Listed  |
